INTRODUCING INDIA'S FIRST

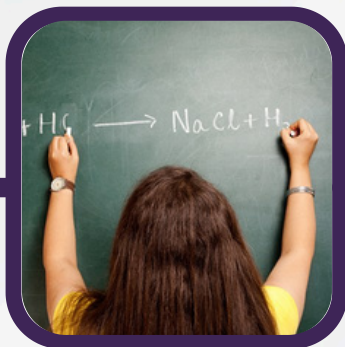

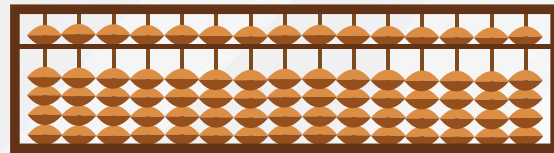

META SKILL BASED ABACUS CLASS

NOT JUST A REGULAR ABACUS CLASS,
BUT MORE THAN WHAT YOU HAVE EXPECTED.

WITH LOTS OF ACTIVITIES & FUN !!!

OTHER ACTIVITIES :

- **Meditation**
- **Public Speaking**
- **And Many More**
- **Brain Gym**
- **Both Hand Writing**

The Leading Child Brain Development Institute

ABACUS

ORPHOSYS
ABACUS

TEN LEVELS OF TRAINING DIVIDED IN TOTAL THREE MODULES :

MODULE 1

- Concept of Abacus
- History of Abacus
- Beads Concept
- Numbers Concept
- Basic Addition & Subtraction
- Advance Addition & Subtraction
- Negative Numbers Addition & Subtraction Concepts of Mental Arithmetic Visualisation Image Abacus
- Handling of Students
- Speed Theory & Many More

MODULE 2

- Concept of Basic Multiplication
- Concept of Basic Division
- Advance Multiplication and Division
- Multiplication Table Concept
- Image Abacus etc

MODULE 3

Advance Operations like

- LCM
- GCD
- Square Root
- Cube Root
- Percentage (%)
- Mean
- Fractions
- Decimal
- Addition & Subtraction

FOR 3+ TO 7 YEARS STUDENTS

Why choose Orphosys Education for Abacus?

- All Levels Training
- Lifetime Support and consultancy without any additional charges
- Word Class Content
- Books According to 3 age groups
- Investment Plan Strategies
- Guaranteed Success Plan of Business
- Quality Control Management Certification
- Exam -Paper
- Platform for Competition
- Win-Win Strategies for Teacher
- Evaluation of Results frequently
- Motivational Support
- Professional Team
- Team of World Class Trainers
- Concept Based Training
- Multiplication Easy Techniques
- Advance Level Training
- Prompt Service
- Feedback Mechanism to make things better
- Special Content for Small Kids

D.M.I.T

ISO 9001:2015

DMIT, which stands for Dermatoglyphics Multiple Intelligence Test, is a method that analyzes fingerprint patterns and our brain activities to gain insights into an individual's inborn talents, innate abilities, learning styles etc. It is based on the scientific method understanding that each person's fingerprints are unique and can provide information about their neurological development.

There are three types of DMIT services:

- **Lifetime DMIT:** This type of DMIT aims to assess an individual's multiple intelligences and provide insights into their potential strengths and weaknesses. It can help parents and educators to understand a child's learning style, aptitudes, and areas of interest. The results of the Lifetime DMIT are often used to guide educational and career decisions.
- **Compatibility DMIT:** Compatibility DMIT focuses on analyzing the fingerprints of two individuals to determine their compatibility in various aspects such as personal relationships, business partnerships or marriage. It aims to provide insights into the strengths and areas of compatibility between two individuals based on their fingerprint patterns.
- **Corporate DMIT:** Corporate DMIT is tailored for the corporate sector and aims to assess employees' strengths, abilities and potential job roles based on their fingerprints. It can assist in talent management, team building, and career development within an organization.
- Some experts argue that the link between fingerprints and intelligence or personality traits is not well-established scientifically. Therefore, it is advisable to approach DMIT with caution and rely on a more comprehensive assessment that includes multiple factors when making important life decisions.

It is important to note that DMIT service is offered only by Orphosys Education Pvt. Ltd. So, if you are interested in exploring DMIT services provided by Orphosys Education, we recommend contacting us directly for more information about our methodology, the specific benefits we claim to offer, and any scientific evidence or research supporting their approach.

CHESS

**orphosys
education**

ISO 9001:2015

Chess is a two-player strategy board game played on a checkered board with 64 squares arranged in an 8x8 grid. The game is played by millions of people worldwide, both professionally and for recreation. It is an abstract strategy game and involves no hidden information.

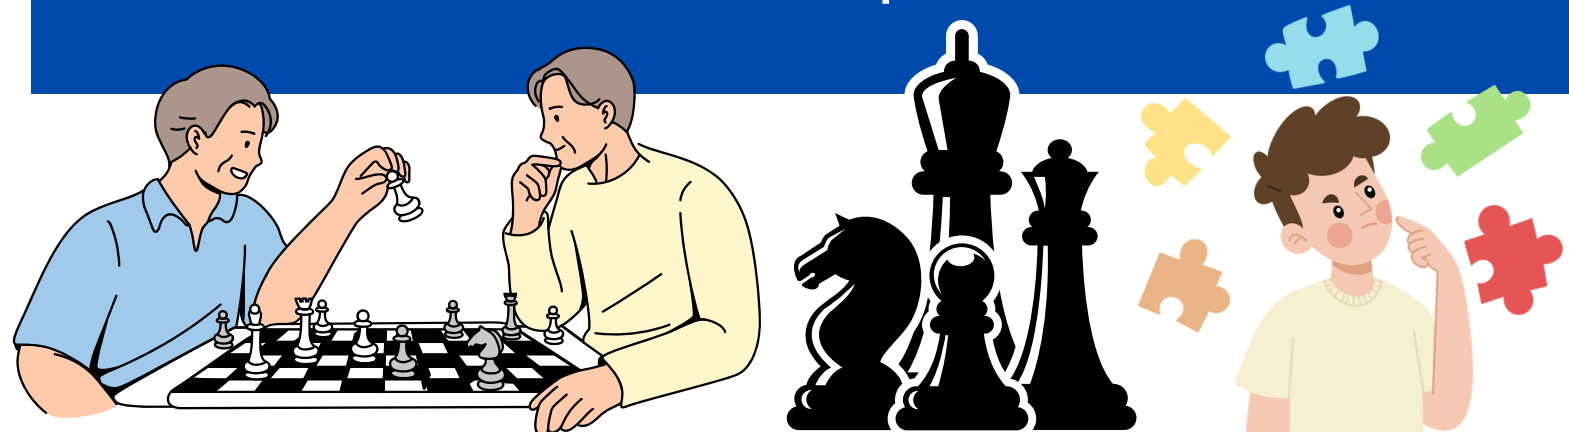

OBJECTIVE :

The primary objective of the game is to 'checkmate' the opponent's king. A checkmate occurs when the king is under attack (in 'check') and has no legal move to escape the attack.

WHY CHESS :

Focusing on chess is a strategic way to explain its importance. The game is an exceptional tool for child brain development because it **enhances critical thinking and problem-solving skills** by requiring players to think ahead and analyze situations. It also **improves memory and concentration** by demanding sustained focus and the recall of strategies. Finally, chess fosters creativity, resilience, and patience, teaching children to handle challenges, learn from mistakes, and think creatively to find solutions, which are all essential skills for academic and personal success.

SPOKEN ENGLISH

**orphosys
education**

ISO 9001:2015

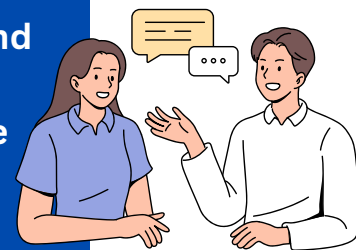

Spoken English is the verbal form of the English language, used for communication through speech. It differs from written English in several key ways, including vocabulary, grammar, and pronunciation. It's a dynamic skill essential for everyday interactions, professional settings, and social connections.

Key Aspect :

Spoken English encompasses several interconnected elements that contribute to effective communication.

- **Pronunciation:** This involves the correct way of producing sounds, including vowel and consonant sounds, syllable stress, and intonation.
- **Fluency:** Fluency is the ability to speak smoothly and continuously, without excessive hesitation. It's not about speaking fast, but about speaking naturally and effortlessly. A fluent speaker can easily connect thoughts and ideas.
- **Vocabulary:** Spoken English often uses a different set of words and phrases than written English. This includes colloquialisms, slang, and idiomatic expressions.
- **Grammar:** While spoken English follows grammatical rules, it can be more flexible than written English.
- **Listening Comprehension:** Effective communication is a two-way street. Being able to understand native and non-native speakers is as important as being able to speak yourself. This involves recognizing different accents, speeds, and vocabulary.

Global Communication and Connection :

English serves as a lingua franca, or a common language, for people from different countries. Whether for travel, international business, or social networking, being able to speak English allows you to communicate with a vast number of people and break down cultural and linguistic barriers.

Career Advancement and Opportunities :

In today's globalized job market, proficiency in spoken English is a highly valued skill. It's often a prerequisite for roles in multinational companies and is essential for effective communication in business meetings, presentations, and collaborations with international clients. This skill significantly enhances your employability and opens doors to a wider range of career opportunities.

Access to Knowledge and Education

A significant portion of the world's academic research, online content, and educational resources are in English. Being fluent in spoken English allows you to access this wealth of information directly, participate in international academic discussions, and pursue higher education at prestigious universities worldwide where English is the primary language of instruction.

MEMORY SCIENCE

orphosys
education

ISO 9001:2015

We understand that a child's brain is not just a storage container; it's a dynamic system for acquiring, storing, and retrieving information. Our focus on memory science is at the core of our mission to equip children with the fundamental skills they need to succeed in school and in life. We don't simply ask them to "memorize"; we teach them how to remember, building the cognitive infrastructure for all future learning.

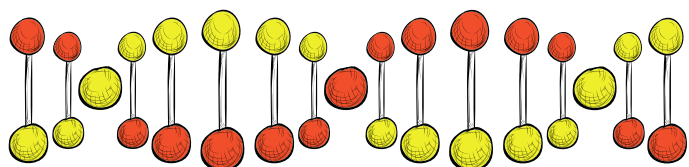

1. The Key to Academic Success : Memory is the bedrock of academic performance. It's how a child retains facts, understands concepts, and builds on prior knowledge. A child who can recall information efficiently will find it easier to learn new subjects like math formulas, historical dates, and vocabulary. Our programs enhance a child's ability to encode and retrieve information, making learning more effective and less frustrating.

2. Enhancing Problem-Solving and Critical Thinking : Memory isn't just about repetition; it's about making connections. When a child can easily access and recall information, they free up their working memory to engage in higher-order thinking. For example, a child with a strong working memory can hold multiple steps of a math problem in their mind while they solve it. We train children to organize information in their brains, which allows them to think more logically, solve problems more creatively, and make better decisions.

3. Boosting Confidence and Reducing Stress : When a child struggles to remember what they've learned, it can lead to anxiety and a lack of confidence in their own abilities. By teaching them scientifically-backed memory techniques, we empower children to take control of their learning. As they see tangible results and feel more confident in their ability to recall information, their self-esteem grows, and their academic stress decreases.

4. Building Stronger Neural Pathways : A child's brain is highly "plastic" and adaptable. Memory training exercises, games, and techniques strengthen the neural connections in areas of the brain responsible for memory, such as the hippocampus. This process is like building and reinforcing the "highways" in their brain, making information transfer faster and more efficient. This neurological development is a lasting benefit that will serve them for a lifetime.

We are passionate about the science of learning. Our programs are designed not just to fill a child's mind with facts, but to teach them the art and science of memory, giving them the ultimate tool for success in an ever-changing world.

POSITIVE PARENTING PROGRAM

**orphosys
education**

ISO 9001:2015

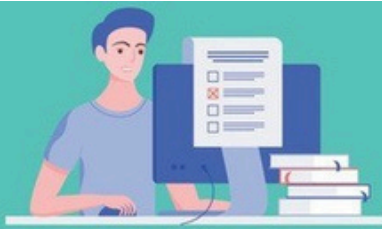

Indeed, the rapid advancements in technology and the changing dynamics of the world have brought about new challenges in old parenting styles. As children adapt to the new methodologies of the modern world, parents need to develop their parenting style and adopt the new parenting style to foster better communication and understanding with their children. Nowadays, all parents want to create a better future for their children. Orphosys Education brings the solution to the problem. Orphosys Education seems to recognize the need for updating parenting approaches and bridging the communication gap between parents and children. By offering a program that teaches advanced parenting styles, they aim to provide parents with the necessary skills and knowledge to effectively communicate with their children and address the unique challenges of the modern era.

In the world, every person is good in nature. But what we say is always bad that is the behavior of human beings. For the last 7 to 14 years we have been able to convert this “bad behavior” to “good behavior” through this positive parenting program. This is the best highlight feature of our course which we provide to parents to make them advance with their children in this modern world. The Positive Parenting Program, also known as Triple P, is an advanced parenting program that can provide parents with updated strategies for fostering healthy parent-child relationships, promoting effective communication, and understanding the needs of their children in today's digital age. It focuses on building strong parent-child relationships, setting clear expectations, and using positive discipline strategies. It aims to equip parents with effective tools and strategies to understand and address their children's behavior while fostering their emotional well-being.

By participating in the Positive Parenting Program, parents can gain insights into child development, learn effective communication techniques and acquire strategies to manage challenging behaviors. The program provides practical guidance and support to help parents create a nurturing and positive home environment where children feel understood, respected, and loved. If you are interested in enrolling in the Positive Parenting Program offered by Orphosys Education Pvt. Ltd. we recommend reaching out to our office directly for more information on the course content, duration, and enrollment process. We will be able to provide you with specific details about how our program can address the challenges you are facing in your parent-child relationship.

ABACUS, VEDIC MATHS HANDWRITING TRAINING

HANDWRITING

Handwriting training teaches children the skills for clear and consistent writing, including fine motor development, letter formation, and spacing. It's a crucial foundation for academic success and effective communication.

ABACUS

Children use the abacus to learn math hands-on, improving number sense, spatial awareness, and basic arithmetic. The tactile experience boosts concentration, discipline, and prepares them for mental math. It also offers a cultural perspective, fostering early confidence in math.

VEDIC MATHS

Vedic math, inspired by ancient Indian techniques, simplifies calculations to enhance children's mental math skills. It boosts number sense, problem-solving, and overall math confidence, making the subject more accessible and enjoyable.

VEDIC MATHS

**ORPHOSYS
ABACUS**

TOPICS COVERED IN VEDIC MATHS :

1. Concept of Multiplication (Multiple Techniques)
2. Concept of Division (Basic & Advance)
3. Divisibility
4. Square and Square Root
5. Cube and Cube Root
6. Decimals
7. HCF Concept
8. LCM Concept
9. Simple Equations
10. Base and Sub Base Number
11. Smart Multiplication
12. Super Prediction
13. Algebraic Factorisation
14. Linear Equations
15. Mental Magic
16. Many More

Beginner (6 Months)

Intermediate (6 Months)

Advanced (6 Months)

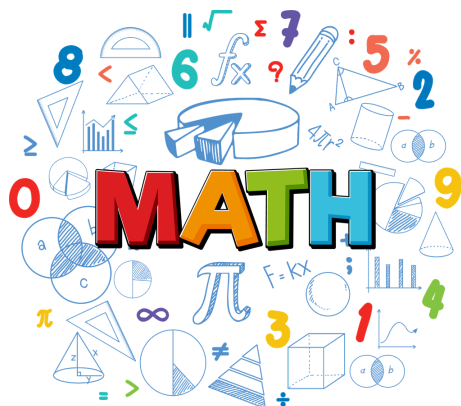

Expert (6 Months)
